

AI Driven Data & Decision Intelligence at Scale

Data & AI Advisory | Modern Data Platforms | Agentic DataOps | BI & Decision Intelligence | Data & AI Governance

We help enterprises build modern data foundations and AI-driven decision intelligence from cutting-edge data platforms to conversational BI to governed AI, delivered by expert talent with three named IP assets that ship, not just slide.

Founded	Newers	Data Practitioners	Data Scientists & AI Experts	Data Analysts & BI Developers	Client Locations	Delivery Centers
2008	2200+	150+	50+	30+	25+	6

Offices in **India, USA, Australia, Singapore & UAE**

Our Approach

We don't just deliver pipelines and dashboards; we build modern data foundations and AI-driven decision intelligence aligned to your business outcomes.

Advisory-first thinking - expert led assessment before delivery

AI-Ready by design - every platform built for analytics, BI, and AI

IP-accelerated delivery - usage of proprietary accelerators - NIMBUS, Agentic DataOps

Outcome-led engagements - aligned to measurable business KPIs

Stack-agnostic - Databricks, Snowflake, AWS, Azure, GCP

Our Data Capabilities

01 Flagship Data & AI Advisory

Advisory by people who build. Senior-led engagements that shape data & AI decisions before the build begins. Target-architecture blueprints (8-12 wk sprints) • Data democratization advisory • DRAF self-service scorecard • Full DRAF 2-4 wk diagnostic

02 Modern Data Platforms

Data platform foundations for analytics, BI, and AI. Source-agnostic ingestion, medallion architecture, PII masking, RAG corpus curation. Named IP: NIMBUS - 25-30% cost savings proven at Symphony Talent

03 Agentic DataOps

Pipelines that monitor, root-cause, and auto-resolve themselves. LLM-assisted classification, plain-English alerts, cost intelligence. Named IP: Pulse - agentic DataOps engine (first-mover)

04 BI & Decision Intelligence

From classic dashboards to self-served conversational analytics. Semantic layer design, MDM, embedded analytics, NL-to-SQL, agentic BI workflows. Power BI • Tableau • Qlik • ThoughtSpot • Databricks Genie • Copilot • RAG-on-SQL

05 Data & AI Governance

Governance frameworks that scale across data and AI - lineage, classification, MDM, PII masking, AI model risk, bias monitoring, regulatory compliance. MAS • RBI • APRA • GDPR • HIPAA • Unity Catalog • Collibra • Atlan • MLflow

Trusted by Global Enterprises

TATA PLAY

MARUTI SUZUKI

Tabcorp

pwc

Our IPs & Digital Accelerators

DRAF

AI & Data readiness assessment framework - Six-pillar diagnostic

Nimbus

Intelligent data ingestion, validation and quality platform

Agentic DataOps

Agentic DataOps engine - self-healing data pipelines

Platforms and Partnerships

What Sets Us Apart

AI-Ready by design - every platform built for analytics, BI, and AI

Accelerator-led execution for faster time-to-value

Expert-led delivery - practice architect on every engagement

Stack-agnostic offerings - Databricks, Snowflake, AWS, Azure, GCP

Governance baked into the platforms by design, not as an afterthought

Outcome-led engagements - measurable business KPIs

Start Your Data & AI Journey

TO THE NEW partners with forward-thinking enterprises to build modern data foundations, AI-driven decision intelligence, and governed AI - at enterprise scale, with expert-led delivery.

Ask us how to

- Assess your data platforms for AI readiness
- Migrate legacy systems to a modern data platform (Databricks, Snowflake, AWS, Azure, GCP)
- Make your data AI-ready (vector lane, RAG corpus, synthetic data)
- Move from dashboards to conversational, agentic BI & decision intelligence
- Build governance for both data and AI
- Move from AI pilots to enterprise-scale impact-GDPR, HIPAA, MAS, RBI, APRA
